

Let Cyberquery turbocharge your **PROGRESS** applications

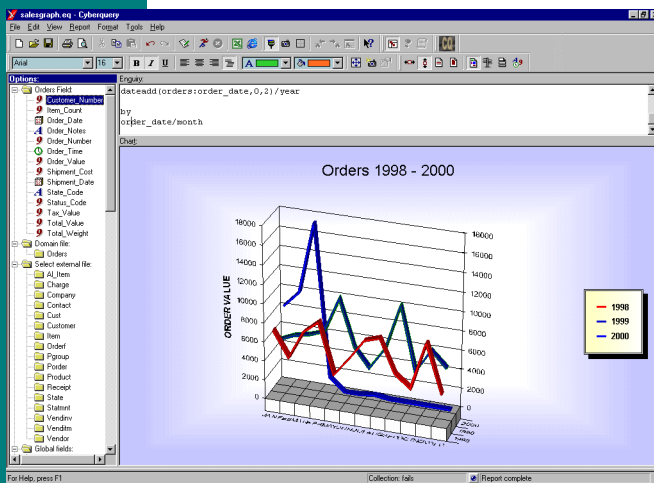

Empower your key decision makers with fast, accurate information. Effective and timely decisions are vital to the success of your business: Cyberquery provides the information required.

Do you think **"I know the information is in there - it shouldn't be that hard to get at"?**

You're right. Cyberquery lets you access all the uniquely valuable information in your Progress applications when you want, how you want.

- Cyberquery is a major breakthrough which can double the value of your investment in your Progress applications.
- Cyberscience, the company behind Cyberquery, has spent over 20 years researching and eliminating the barriers to your valuable business information.

"It was only after we installed Cyberquery that our investment in new systems became worthwhile."

- Cyberquery supports all major computer systems, from UNIX to NT. Cyberquery provides the fastest way for you to access Progress, together with simultaneous access to SQL Server, Oracle, Informix On-line, MFCOBOL, C-ISAM and most others through a native interface.
